DETAILED ACTION

1. In view of the amendment filed June 29, 2007, claims 3, 4, 7, 9, 10 have been cancelled. Claims 1, 2, 5, 6, 8, 11-19 are pending.
2. In view of the amendment filed June 29, 2007, the rejection of Claims 1-19 under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Donald et al. (US 6,306,994 B1), is withdrawn.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.

Art Unit: 1713

4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
4. Claims 1, 2, 5, 6, 8, 11-19 are rejected under 35 U.S.C. 103(a) as obvious over Sano et al. (US 2003/0144377 A1).

Sano et al. (page 13, claim 7) disclose a ABC type triblock copolymer comprising block A that is hydrophobic, Block B that is hydrophobic with other monomers added, and Block C that can be freely chosen. Since Block C can be freely chosen, Block C can also be chosen to be the hydrophilic since Block A is already hydrophobic. Regarding hydrophilic monomers, Sano et al. (page 4, 0078) disclose a block unit comprising ethylenic monomer containing ionizable groups including carboxylic acid functionalities.

The difference between the invention of claims 1, 2, 5, 6, 8, 11-19 and Sano et al. is that the hydrophilic monomers of Sano et al. are silent on the ether spacer group between the polymer maintain chain and the carboxylic acid group of formula (1) of claim 1.

Since Sano et al. (page 4, 0078) disclose a block unit comprising ethylenic monomer containing ionizable groups including carboxylic acid functionalities, Sano et al. teach a family of compounds that generically include the compound as claimed (formula (1) of claim 1). Motivated by the expectation of success of obtaining the ABC triblock copolymers of Sano et al., it would have been obvious to one of ordinary skill in

Art Unit: 1713

art to recognize and appreciate any ethylenic monomer containing ionizable groups including carboxylic acid functionalities, such as the formula (1) of claim 1 to obtain the invention of claims 1, 2, 5, 6, 8, 11-19.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
